Uma nova realidade para os empreendedores, com sabor de tecnologia de ponta!

Una nueva realidad para los emprendedores, ¡con sabor a tecnología de punta!

A new reality for entrepreneurs, with a state-of-the-art technology flavor!

NOVO TRAVAMENTO DAS CAVIDADES

COM BARRA DE AÇO INOX 304L EM SOLDA POR RESISTÊNCIA SOMENTE NA ÁREA DE CONTATO, O QUE FACILITA A LIMPEZA DO PRODUTO.

Nuevo trabamiento de las cavidades: con barra de acero inoxidable 304l en soldadura por resistencia solamente en el área de contato, facilitando la limpieza del producto.

New cavity locking: with a 304l stainless steel bar in resistance welding only in the contact area, making the cleaning of the product much easier.

Com friso longitudinal e um aumento na espessura da borda, juntas as formas criam um espaço vazio que diminui a área de contato entre elas e a possibilidade de respingo, para o lado interno, durante a fabricação dos picolés.

Con friso longitudinal y un aumento en el espesor del borde, juntos, crean los moldes un espacio vacío que disminuye el área de contacto entre ellos y la posibilidad de salpicadura, hacia el lado interno, durante la fabricación de paletas heladas.

With a longitudinal frieze and increased edge thickness, all together, the molds create an empty space diminishing the area of contact between them, as well as the possibility of splash towards the inside during ice pop manufacturing.

AGORA, COM MAIOR RESISTÊNCIA A IMPACTO! E O MELHOR: MANTENDO A LEVEZA DE SEMPRE, O QUE AUMENTA SUA PRODUTIVIDADE E FACILITA O MANUSEIO DURANTE O PROCESSO DE PRODUÇÃO.

!Ahora con mayor resistencia a impacto! y lo mejor: manteniendo la ligereza de siempre, aumentando su productividad y facilitando el manejo durante el proceso de producción.

Now with higher impact resistance! and the best: keeping its usual lightness, increasing productivity and making its handling during the process much easier.

Releases

Molde de Bombom Coração: este modelo produz 38 bombons de sorvete, de uma única vez, em formato de coração. Para extrair os bombons utiliza-se o tradicional extrator de pinos desenvolvido com a tecnologia Ataforma.

Molde de Bombón Corazón: produce este modelo 38 bombones de helado de una sola vez, en formato de corazón. Se utiliza para sacar los bombones el tradicional extractor con pinos desarrollado con la Tecnología Ataforma.

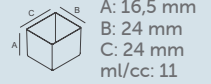

Heart Bombon Mold: this model produces 38 heart-shaped ice cream bombons at once. The traditional pinned extractor is used for releasing the bombons. It was developed by Ataforma Technology.

Molde de Bombom Quadrado: este modelo produz 36 bombons de sorvete, de uma única vez, em formato de coração. Para extrair os bombons utiliza-se o tradicional extrator de pinos desenvolvido com a tecnologia Ataforma.

Molde de Bombón Cuadrado: produce este modelo 36 bombones de helado de una sola vez, en formato de corazón. Se utiliza para sacar los bombones el tradicional extractor con pinos desarrollado con la Tecnología Ataforma.

Square Bonbon Mold: this model produces 36 heart-shaped ice cream bombons at once. The traditional pinned extractor is used for releasing the bombons. It was developed by Ataforma Technology.

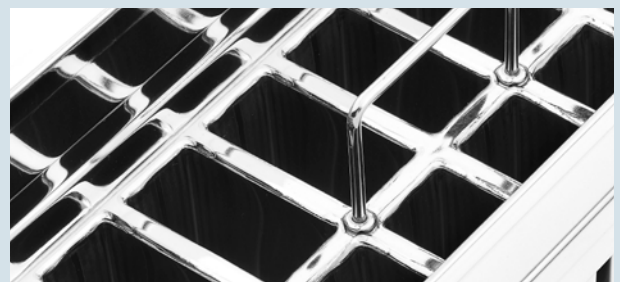

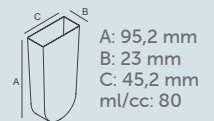

PICOLÉ "EXTRUSADO"

Megamaxxi: o único molde com 28 cavidades para fazer picolé "extrusado". O tradicional sorvete de massa no palito com 80 ml é ideal para a sua linha Premium. As cavidades do Megamaxxi possuem espessuras maiores, e só foi possível fabricá-lo devido à Tecnologia Ataforma, visto que o espaço entre as cavidades é mínimo, porém, suficiente para o banho de chocolate. A vantagem do Megamaxxi é que os extratores (paliteiras) e os alinhadores são os mesmos daqueles moldes Ataforma com 28 cavidades que você já utiliza em sua linha de produção. Estamos seguros de que o seu cliente irá gostar desta novidade!

Megamaxxi: el único molde con 28 cavidades para hacer paletas "extrusadas". El tradicional helado de masa en el palillo con 80 ml es ideal para su línea Premium. Las cavidades del Megamaxxi poseen espesores más grandes, y sólo fue posible fabricarlo debido a la Tecnología Ataforma, puesto que el espacio entre las cavidades es mínimo, sin embargo, suficiente para el baño de chocolate. La ventaja del Megamaxxi es que los extractores (palilleras) y los alineadores son los mismos de aquellos moldes Ataforma con 28 cavidades, los cuales ya se utilizan en su línea de producción. ¡Estamos seguros de que a su cliente le va a encantar esta novedad!

Megamaxxi: the only 28-cavity mold for "extruded" stick ice cream. The traditional 80 ml stick ice cream is ideal for your Premium line. The Megamaxxi cavities have larger thickness, and it was only possible to manufacture it due to Ataforma Technology, since the space between the cavities is the least, however, it is enough for chocolate topping. Megamaxxi's advantage is that the extractors (stick holders) as well as the aligners are the same as those 28-cavity Ataforma molds you already make use of in your production line. We are sure that your customer is going to enjoy this novelty!

Extractor Universal

Extractor Universal
Universal Extractor

Quem cria, recria.

De funcionalidade reconhecida em todo mundo, o revolucionário extrator com padrão diferenciado de regulagem na alavanca foi um produto desenvolvido pela Ataforma há 25 anos ®. Ele foi projetado para prender e liberar palitos.

Como o setor sorveteiro inova com relativa frequência, a Ataforma igualmente investe na praticidade. Após criteriosos estudos, importantes modificações foram efetuadas no extrator, gerando o que denominamos extrator "universal", que é adequado para palitos planos [6, 9, 10, 13, 14 mm], incluindo o tradicional palito hélice. Deste modo, a nova ferramenta unifica em um só produto as funções de um ou outro extrator para diferentes padrões de palito.

Quien lo crea, lo recrea.

De funcionalidad reconocida en todo el mundo, el revolucionario extractor con estándar diferenciado de regulaje en la palanca fue un producto desarrollado por Ataforma hace 25 años ®. Diseñado para prender y liberar palillos.

Puesto que se innova el sector heladero con relativa frecuencia, invierte Ataforma igualmente en la practicidad. Tras criteriosos estudios, se efectuaron importantes modificaciones en el extractor, engendrando lo que denominamos el extractor "universal", que es adecuado para palillos llanos (6, 9, 10, 13 y 14 mm), incluso el tradicional palillo hélice. Así, unifica la nueva herramienta en un sólo producto las funciones de uno o outro extractor para distintas clases de palillo.

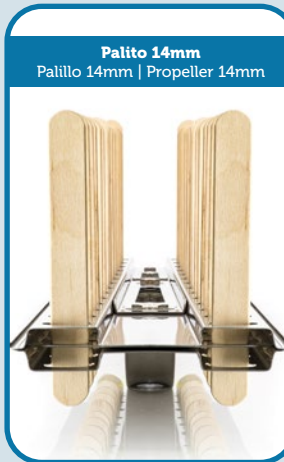

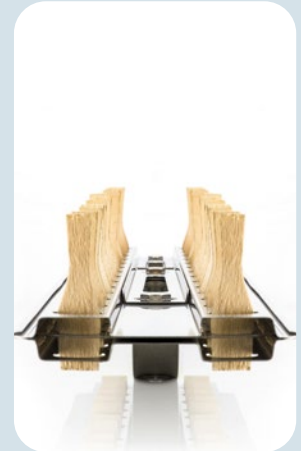

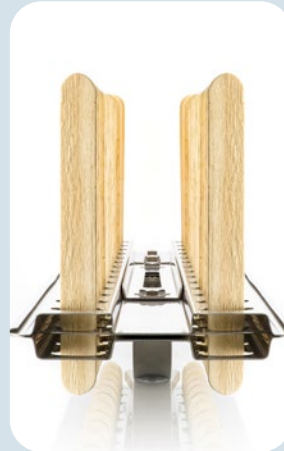

Ataforma es lo que hay de mejor en moldes y accesorios para la fabricación de paletas heladas. ¡Esperen las próximas novedades!

Who creates, re-creates.

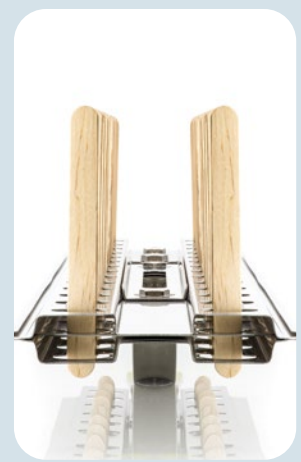

With a functionality recognized all over the world, the revolutionary extractor with a differentiated standard of lever adjustment was a product developed by Ataforma 25 years ago ®. It was designed to fasten and release popsicle sticks.

As the ice cream sector innovates relatively often, Ataforma also invests in practicality. After criterious studies, important modifications were carried out in the extractor, bringing about what we denominate a "universal" extractor, which is suitable to flat sticks (6, 9, 10, 13, 14 mm), including the traditional propeller stick. In this way, the new tool unifies into one product the functions of either extractors for different stick standards.

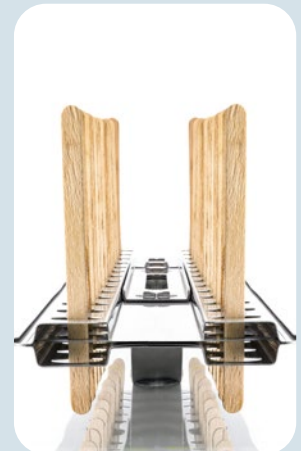

Ataforma is the best choice when it comes to molds and accessories for popsicle manufacturing. Novelties coming soon!

EXTRATORES PARA PALITOS

- 14 e 18 Furos
- 22 e 28 Furos
- 26 Furos

Extratores Especiais

- 14 e 18 Furos (Minidrill, Catarina Helicoidal e Drill)
- 12 furos (Moreninha)

Produzidos em aço inoxidável 304, essa ferramenta agiliza o desmolde, extraindo todos os produtos ao mesmo tempo. Podem ser desmontados para limpeza, mas ao montar observe a seguinte orientação:

Friso para travamento - aperto moderado para não danificar os frisos.

EXTRACTORES PARA PALILLOS

- 14 y 18 Agujeros
- 22 e 28 Agujeros
- 26 Agujeros

Extractores Especiales

- 14 e 18 Agujeros (Minidrill, Catarina Helicoidal e Drill)
- 12 Agujeros (Moreninha)

Producidos en acero inoxidable 304, agilizan el desmolde, extrayendo todos los productos al mismo tiempo. Pueden ser desmontados para limpieza, pero al montar observe la siguiente orientación:

Resalto para bloqueo - presión moderado para no estropear los resaltos.

STICK EXTRACTORS

- 14 and 18 Holes
- 22 e 28 Holes
- 26 Holes

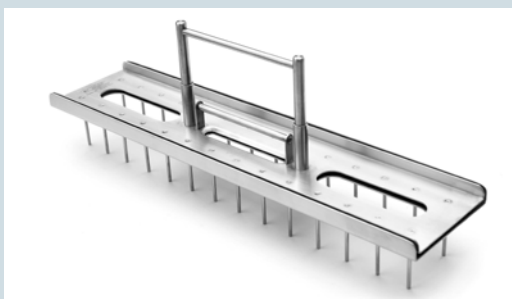

Special Extractors

- 14 e 18 Holes (Minidrill, Catarina Helicoidal e Drill)
- 12 Holes (Moreninha)

Built in stainless steel 304, this tool speeds up the extraction from the mold, extracting all the products at the same time from the mold.

It can be disassembled for cleaning, but when re-assembling it, please observe the following:

Edge for locking - use moderate pressure in order to avoid damaging the edges.

EXTRATORES DE PINOS

12, 14 e 18 pinos (para monoporção e bombons) 22 e 28 pinos (para picolé sem palito)

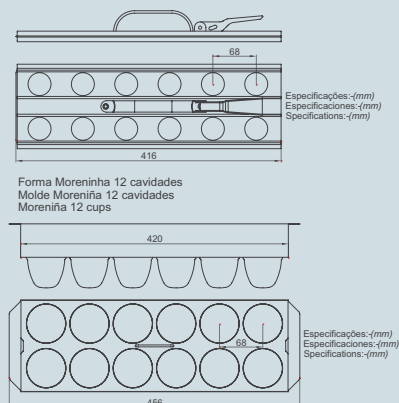

EXTRACTORES CON ALFILERES

12, 14 y 18 alfileres (para monoporción, bonbons) 22 y 28 alfileres (eskimo sin palillo)

STICKLESS HOLDERS

12, 14 and 18 pins (for monoportion, bonbons) 22 and 28 pins (eskimo without stick)

EXTRATOR PARA MORENINHA + SUPORTE: 12 furos
EXTRACTOR PARA MORENINHA + SOPORTE: 12 agujeros
CONE HOLDER FOR MORENINHA + BASE: 12 holes

ALINHADORES DE PALITOS

Fabricados em alumínio, centraliza e ordena os palitos na altura exata para posteriormente serem fixados pelo extrator de palitos.

Eles são duplos, ou seja, com um alinhador você prepara os palitos para dois extratores. Portanto, nossos alinhadores possuem:

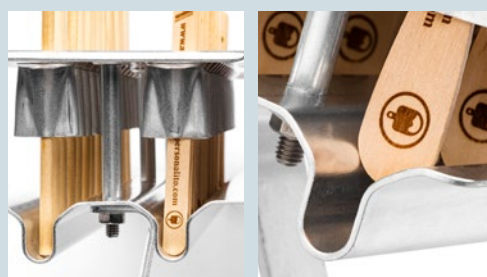

- 28 tubos
- 36 tubos
- 36 tubos especial para produção de picolé nos moldes Catarina Lisa e Catarina Helicoidal
- 44 tubos
- 52 tubos
- 52 tubos especial para palito hélice
- 56 tubos

ALINEADORES DE PALILLOS

Fabricados en aluminio, centralizan y ponen en orden los palillos en la altura exacta para posterior fijación por el extractor de palillos. Ellos son dobles, o sea, con un alineador se preparan los palillos para dos extractores. Por eso, nuestros alineadores poseen:

- 28 tubos
- 36 tubos
- 36 tubos especial para producción de paletas en los moldes Catarina Lisa y Catarina Helicoidal
- 44 tubos
- 52 tubos
- 52 tubos especial para palillo hélice
- 56 tubos

STICK ALIGNERS

Built in aluminum, it aligns and places the sticks in order at the exact height for being fixed by the stick holder. They are double, that is, with one aligner you prepare the sticks for two holders. Thus, our aligners have:

- 28 tubes
- 36 tubes
- 36 tubes, special for use with the molds Catarina Lisa and Catarina Helicoid
- 44 tubes
- 52 tubes
- 52 tubes special for helix sticks
- 56 tubes

Fundada em 1984, a Ataforma se tornou referência no mercado. Seu produto é exportado para mais de 50 países, sendo líder do segmento no Brasil. A empresa está localizada em área urbana de 30.000 m², que contempla complexo fabril, grêmio recreativo e área verde com função ecológica e lazer.
